Hi Carlos,

I think this is a question that Nancy Marroquin of MTA could answer best, since she handles FTIP amendments. Please call her at [\(213\) 922-7237](tel:213-922-7237), and let me know what she said.

Thanks,
Gina

Hi Gina,

We are managing an STPL funded project that had originally been funded through an MTA Call, and the funds were subsequently swapped with STPL funds (I don't know the history other than that). The project is the Hollywood Media District Wayfinding Project, with an FTP project description of "installation of wayfinding signage (SWAP STPL for TEA)". See attached FTIP. At any rate, we have had numerous issues moving this project forward for various reasons, and are inquiring about the possibility of amending the scope of work. Is it possible to change the FTIP-defined scope of work and what would be the steps to do so?

Thanks Gina

Carlos
